

ANA&A-SIMAI 2026 PROGRAM

Thursday, April 9 – Room C (courtyard, ground floor)	
08:30–09:10	Registration
09:10–09:30	Meeting opening
09:30–09:55	Chair: D. CONTE V. FRANCALANZA: <i>Invariant Imbedding Methods for wave propagation and absorption in inhomogeneous media: a stochastic approach applied to fast magnetosonic wave coupling in fusion plasmas</i>
09:55–10:20	D. BORGOGNO: <i>Magnetic chaos in plasmas</i>
10:20–10:45	D. GRASSO: <i>Effects of magnetic chaos on fusion plasmas</i>
10:45–11:25	Coffee break
11:25–11:50	Chair: D. OCCORSIO Y. CARIDI: <i>Advancements of HEMSim Software</i>
11:50–12:15	D. MEZZANOTTE: <i>Numerical treatment of 2D Volterra-Fredholm Integral Equations over equally spaced grids</i>
12:15–12:40	F. ACCORNERO: <i>Static-kinematic Duality and its crucial role in Computational Mechanics: From the adjoint matrix-operator to the Ritz-Galerkin Method</i>
12:40–14:30	Lunch time
14:30–18.30	Industrial Session
14:30–14:50	Chair: C. CESARANO V. MANUELLO (PRIMA POWER): <i>Raccolta ed analisi dati per applicazioni industriali di lavorazione lamiera</i>
14:50–15:10	E. BOGGIO SELLA (BOCCA MALANDRONE SRL): <i>Le reti KAN applicate alla analisi delle serie finanziarie</i>
15:10–15:30	L. FANTAUZZO (DMA SRL): <i>Data-Driven Applications in Railway Infrastructure Diagnostics</i>
15:30–15:50	V. GENOVESE (MEDIRECT BANK): <i>Common statistical and data manipulation difficulties in banking</i>
15:50–16:30	Coffee break
16:30–16:50	Chair: A. DE ROSSI W. FERRARESE (ORCHESTRA SRL): <i>Orchestrare l'analisi dati presso le PMI manifatturiere</i>
16:50–17:10	G. AMATO (TEORES GROUP): <i>Metodologie di Approssimazione e Intelligenza Artificiale per l'Analisi Predittiva in Ambito Industriale e Finanziario</i>
17:10–17:30	G. BOCCI (ARAKNE): <i>Financial Time Series Generation via Schrödinger Bridges: Theory, Implementation, and Extensions</i>
17:30–17:50	M. BELLINZONA (DEDA Ai)
17:50–18:30	Moderators: C. CESARANO, A. DE ROSSI Round table
20:00	Social dinner at “La Nuova Spada Reale” Restaurant – Via Principe Amedeo 53, 10123 Torino

Friday, April 10 – Room Orsi (first floor)	
09:00–09:25	Chair: I. NOTARANGELO I. SANTANIELLO: <i>A Machine Learning Approach to analyze Energy Consumption in HPC DC CRESCO7</i>
09:25–09:50	G. PAGANO: <i>Parameters Estimation in Vegetation Models via Numerical Optimization and CNNs</i>
09:50–10:15	S. ISCARO: <i>On the use of efficient numerical techniques to solve multidimensional parabolic PDEs arising from applications</i>
10:15–10:40	A. HAIDER: <i>Optimizing Basis Functions in KANs for Function Approximation</i>
10:40–11:20	Coffee break
11:20–11:45	Chair: R. CAVORETTO M. F. HEREDIA MOYANO: <i>Using Mathematica Wolfram to study zero distribution and the mesh of polynomials</i>
11:45–12:10	P. BUITRON: <i>A Generalized Laplace–Beltrami Operator in Anisotropic Geometries</i>
12:10–12:35	S. F. HASHEMI: <i>Analytical Approaches to Differential Equations</i>
12:35–14:30	Lunch time
14:30–14:55	Chair: C. CESARANO Y. QUINTANA (ONLINE): <i>On degenerate Appell sequences via Caputo-type fractional difference operator</i>
14:55–15:20	R. INGELMO VICENTE (ONLINE): <i>On degenerate Bernstein forms and their computational features</i>
15:20–15:45	W. RAMIREZ (ONLINE): <i>Generalized degenerate tangent polynomials and their associated matrices</i>
15:45–16:00	Conclusions & Greetings
